OVERVIEW

My expertise lies in designing, developing and executing automated test suites that ensure software products meet optimal standards of quality and reliability, in case of issues or bugs, collaborating closely with developers to swiftly resolve them.

I have keen attention to detail, analytical abilities, and critical thinking skills that drive me to enhance software quality continuously as well as refine and upgrade automated testing processes.

My collaboration and team player attitude empower me to work harmoniously with cross-functional teams helping them to deliver top-notch products that meet stakeholders expectations.

TECHNICAL SKILLS

- Automation of functional, regression, E2E, UI testing of WEB app;
- REST API testing;
- Performance testing with K6;
- Programming languages JavaScript, TypeScript;
- Strong knowledge of SDLC;
- Knowledge of CI/CD pipelines and patterns;
- Strong knowledge of bug life cycle;
- Docker;
- Good practical experience of Shell script, Apache, Nginx;
- Git, Bitbucket version control systems, and various CI/CD;
- Maintaining and administrating Unix OS servers;

NON-TECHNICAL SKILLS

- Requirements testing/auditing/analysis;
- Agile(Scrum&Kanban);
- Jira, Confluence;
- Test design techniques;
- Concepts of GDPR;

STACK OF TECHNOLOGIES

TypeScript, JavaScript, Playwright, WDIO, Mocha, K6, Chai, Allure, Got, Axios, Grafana, Postman, Atlassian Bamboo, AWS, Ubuntu, Docker, ReportPortal, SQL, Tableau ... and more.

SOFT SKILLS

- Upper – intermediate English communication skills (B2)
- High attention to details and organisation
- Strong communication skills for work with different groups within the project
- Service and teamwork orientation
- Good analytical skills
- Willingness to understand complex systems
- Self-motivated, self-disciplined and result-oriented

ACHIEVEMENTS

- Building UI Browser tests from the zero.
- Building API Tests from scratch.
- Developing k6 Performance tests from the zero.

EXPERIENCE

PwC (<https://www.pwc.com/>)

May 2025 - Current time

PwC (short for PricewaterhouseCoopers) is one of the “Big Four” accounting firms in the world. At PwC, we help clients drive their companies to the leading edge. We’re a tech-forward, people-empowered network with more than 370,000 people in 149 countries. Across audit and assurance, tax and legal, deals and consulting we help build, accelerate and sustain momentum.

Role: QA Automation Engineer

Responsibilities:

- Maintaining framework based on Playwright .NET
- Developing and maintaining UI autotests.
- Developing and maintaining API autotests.
- Managing reporting and pipelines integrations (Azure DevOps)
- Daily reporting of current project status.
- Verification of delivery process.

Universum Global (<https://universumglobal.com/>)

Apr 2021 - May 2025

Universum is the most recognised Employer Branding specialist in the world. Part of the StepStone Group and Axel Springer family, our diverse workforce is physically present in over 20 countries. We ensure employers around the world achieve their goals through data-driven Employer Branding. Consequently, this enables them to engage the talent they need to succeed.

Role: QA Automation Engineer

Responsibilities:

- Developing test strategy, test plan and defining criteria and definitions.
- Developing and maintaining infrastructure for auto tests - Bamboo, AWS.
- Building framework and maintaining UI-E2E auto tests from scratch (Webdriver.io).
- Developing API tests from scratch.
- Performance testing with K6
- Developing a service for data verification and validation.
- Daily reporting of current project status.
- Execution and verification of the delivery process.
